

# Submission

After creating the zip file that you want to submit follow these steps:

## Colab Users

1. Connect to your Google Drive using the following code:

```
from google.colab import drive
drive.mount('/content/drive')
```

2. Copy the zip file to your desired location:

```
!cp submission.zip /content/drive/MyDrive/<your directory>
```

3. Open Google Drive and open the directory of your submission file.
4. Right-click on your file and then Share.
5. Change the access permission from Restricted to Anyone with the link.
6. Copy your link.
7. Provide your link in the submission section of your dashboard.

## Kaggle Users

1. After creating your zip file run these commands.

```
from IPython.display import FileLink
FileLink('file_name.zip')
```

2. You will be provided with a text that is hyperlinked to your file.
3. Drag and drop the provided hyperlink to a code cell to see its destination URL.
4. Open a colab session and use the URL to download your file to colab:

```
!wget <Your_URL_Here>
```

5. Follow the steps in the Colab Users guide to submit your file.
